

1. Open the homepage of your favorite food delivery app (like Zomato or Swiggy) and identify the main elements (title, headings, images, links) that you think help it appear in Google search results. List at least 5 elements and explain why each might be important for SEO.

Answer: Zomato

The main SEO elements I would look for on the Zomato homepage are:

SEO Element	Why It Is Important
1. Page Title	The title tells Google what the webpage is about. A title containing terms such as “food delivery” and “restaurants” can help the page rank for relevant searches.
2. Headings (H1, H2, etc.)	Headings organize the content and help search engines understand the main topics covered on the page.
3. Images	Food and restaurant images make the page attractive. Descriptive alt text can also help search engines understand what an image represents.
4. Internal Links	Links to restaurant pages, food categories, cities, and other sections help Google discover and understand more pages on the website.
5. Relevant Keywords	Terms such as “food delivery,” “restaurants near me,” and “order food online” match what users may search for on Google.
6. Meta Description	A well-written meta description summarizes the page in search results and can encourage users to click on the website.

Conclusion: These elements help search engines understand the website's content while also making the page easier and more useful for visitors.

2. Write an SEO-friendly title and meta description for a Flipkart product page selling wireless headphones. Make sure your title is under 60 characters and your description is under 160 characters.

Answer:

SEO Title:

Buy Wireless Headphones Online | Flipkart

Character count: 42 characters

Meta Description:

Shop wireless headphones online on Flipkart. Compare features, prices and offers on Bluetooth headphones for music, calls and everyday use.

Character count: 133 characters

Target Keywords:

- Wireless headphones
- Buy wireless headphones online
- Bluetooth headphones
- Headphones online
- Flipkart headphones

The main keyword “**wireless headphones**” is included naturally in both the title and description.

3. Pick any YouTube video you like and use your browser's 'View Page Source' feature to find the meta tags for title and

description. Copy them and explain whether you think they are optimized for SEO or not, giving 2 reasons for your answer.

Answer: Example YouTube Video

Video Title:

“Top 10 Most Amazing Places to Visit in India”

Meta Title:

Top 10 Most Amazing Places to Visit in India - YouTube

Meta Description:

Discover the top 10 most amazing places to visit in India. Explore beautiful destinations, exciting experiences and travel ideas for your next trip.

SEO Analysis:

Yes, I think the title and description are SEO-friendly for two reasons:

1. **Relevant keywords:** The title naturally contains important search terms such as “**Top 10,**” “**Amazing Places,**” “**Visit,**” and “**India.**”
2. **Clear description:** The description explains what viewers will find in the video and includes relevant terms such as “**travel,**” “**destinations,**” and “**India.**” This can help both search engines and users understand the video's topic.

Note: For your actual assignment, choose a YouTube video you like and copy the exact title/description from its page source rather than using this example.

4. Use ChatGPT or any AI tool to generate a list of 10 keywords someone might use to search for the latest IPL cricket

highlights. Paste the list and pick the top 3 keywords you would use in your own blog post title.

Answer: 10 IPL Highlight Keywords

1. IPL highlights
2. Latest IPL highlights
3. IPL match highlights
4. IPL highlights today
5. IPL cricket highlights
6. Today IPL match highlights
7. IPL latest match highlights
8. IPL highlights video
9. IPL match today highlights
10. Latest IPL match video

Top 3 Keywords I Would Use

1. IPL highlights
2. Latest IPL highlights
3. IPL match highlights

SEO-Friendly Blog Title:

“Latest IPL Highlights: IPL Match Highlights & Key Moments”

This title uses the three selected keywords naturally while clearly telling readers what the blog post contains.
