

Question 1.

Pick any product page from Flipkart or Amazon and list 5 on-page elements that you think help it rank higher in Google search results. For each, write one line on why it matters for ranking.

Answer:

I have selected a **wireless headphones product page on Flipkart**.

On-Page Element	Why It Matters for Ranking
1. Product Title	A clear product title containing relevant keywords helps Google understand the product and match it with relevant searches.
2. Product Description	Detailed and useful product information gives search engines more relevant content to understand and index the page.
3. Product Images & Alt Text	Optimized images improve user experience, while descriptive alt text helps search engines understand the images.
4. Customer Reviews	Reviews provide fresh user-generated content and additional relevant words and phrases related to the product.
5. Internal Links	Links to related products and categories help search engines discover and understand other pages on the website.

Question 2.

Create a table comparing 5 different ranking factors (like page speed, mobile-friendliness, keyword usage, backlinks, and user reviews) and rate their importance for a food delivery app like Zomato. Use 'High', 'Medium', or 'Low' for each.

Answer:

Ranking Factor	Importance for Zomato	Reason

Page Speed	High	Fast-loading pages provide a better experience for users searching for restaurants and food.
Mobile-Friendliness	High	Food delivery users commonly access services through smartphones, making mobile usability very important.
Keyword Usage	High	Keywords such as “food delivery,” “restaurants near me,” and “order food online” can help search engines understand the page.
Backlinks	High	Quality backlinks from trusted and relevant websites can strengthen website authority and search visibility.
User Reviews	High	Reviews provide useful user-generated content, increase trust, and can add relevant information about restaurants and food.

Question 3.

Analyze the homepage of BookMyShow and identify 3 ranking factors that could be improved to boost its SEO. Suggest one practical change for each factor.

Answer:

1. Page Speed

- **Improvement:** BookMyShow can improve page speed by compressing large movie posters, banners, and other images.
- **Practical Change:** Use optimized image formats such as WebP and lazy-load images that are not immediately visible.

2. Keyword Optimization

- **Improvement:** The homepage can naturally target keywords such as “**book movie tickets online,**” “**movies near me,**” and “**movie ticket booking.**”
- **Practical Change:** Add useful, keyword-focused headings and short descriptive content to relevant homepage sections.

3. Mobile-Friendliness

- **Improvement:** The website should provide a smooth experience for users searching and booking tickets on smartphones.

- **Practical Change:** Optimize menus, buttons, movie cards, and booking options for smaller screens and ensure they are easy to tap.

Question 4.

Use ChatGPT or any AI tool to generate a checklist of 10 ranking factors for optimizing an Instagram profile page for search engines. Submit the checklist and highlight any 2 factors you didn't know before.

Answer:

Instagram SEO Checklist

- ✓ 1. Use relevant keywords in the Instagram username
- ✓ 2. Optimize the profile name with important keywords
- ✓ 3. Write a clear and keyword-relevant bio
- ✓ 4. Clearly mention the business or content category
- ✓ 5. Add a relevant location when applicable
- ✓ 6. Use relevant keywords naturally in post captions
- ✓ 7. Use relevant and specific hashtags
- ✓ 8. Add descriptive alt text to images
- ✓ 9. Post high-quality and relevant content consistently
- ✓ 10. Encourage engagement such as comments, shares, and saves

★ 2 Factors I Didn't Know Before

1. Alt Text

I did not know that Instagram images can use **alt text**. Descriptive alt text helps explain image content and improves accessibility and discoverability.

2. Profile Name Optimization

I did not know that the **Instagram profile name** can also contain relevant keywords. Using appropriate keywords can make the profile easier for users to discover through search.

Conclusion

These ranking factors show that SEO is not limited to Google websites. **Product pages, food delivery apps, entertainment websites, and social media profiles** can all benefit from relevant keywords, good user experience, useful content, mobile-friendliness, and strong engagement.
