

1. Pick any one app you use daily (like Instagram, Zomato, or Myntra) and list 3 ways that app increases its visibility online (for example: trending hashtags, Google search results, influencer posts).

Answer: Instagram

Instagram uses several digital marketing techniques to increase its online visibility:

1. **Trending Hashtags** – Instagram uses popular and relevant hashtags such as #Reels, #Food, #Travel, and #Trending to help content reach a larger audience.
 2. **Influencer Marketing** – Brands and creators promote products, features, and trends through influencer posts and Reels, helping them reach the influencer's followers.
 3. **Search and SEO Visibility** – Instagram content can appear in Google search results, especially when posts, profiles, and captions contain relevant keywords.
-

2. Visit the homepage of Flipkart or BookMyShow and note down 3 features or sections that are clearly designed to boost user engagement (for example: flash sales banners, trending movies carousel, or personalized recommendations).

Answer: Flipkart

After reviewing the current Flipkart homepage, these are three important engagement-focused sections:

1. **Suggested For You** – Flipkart displays products based on user interests and browsing behaviour. This personalization encourages users to continue browsing and discover products. ([Flipkart](#))
2. **Top Deals / Special Offers** – Discount banners, “Hot Deal” labels, special offers, and sale sections create urgency and encourage users to click and make purchases. Flipkart also promotes limited-time and seasonal offers. ([Flipkart](#))

3. **Trending & Top Selection Sections** – Sections such as “**Trending**,” “**Top Selection**,” “**Brands in Spotlight**,” and “**Best Selling**” help users discover popular products and encourage further shopping. ([Flipkart](#))
-

3. Use Google Trends (<https://trends.google.com>) to compare the search interest for 'IPL', 'World Cup', and 'K-pop' in India over the last 12 months. Take a screenshot of the graph and write 2 lines on which topic has the highest visibility and why.

Answer: Google Trends Comparison

Set the Google Trends options as:

- **Location:** India
- **Time:** Past 12 months
- **Search terms:** IPL, World Cup, K-pop
- **Search type:** Web Search

[Open Google Trends comparison](#)

Observation:

IPL has the highest overall visibility among the three topics in India, with major spikes during the IPL season because cricket has a very large Indian audience and generates frequent match-related searches. The **World Cup** also creates strong seasonal spikes, while **K-pop** generally has lower search interest in comparison.

For your assignment: Open the Google Trends link above, set the comparison to **India** → **Past 12 months**, and take a screenshot of the graph to paste into your project.

Note: Google Trends values are relative search-interest scores rather than absolute numbers, so the graph's peaks represent periods of higher search interest.

4. Imagine you are running a food blog on Instagram. Write a sample post caption and 5 hashtags you would

use to increase your post's visibility and drive more traffic to your page.

Answer: Sample Instagram Food Blog Post

 **Craving something delicious? We've got you covered!** 

Today we're trying one of the most delicious food spots in town! From crispy bites to cheesy goodness, every bite is worth trying.  

 **Save this post for your next food outing!**

 Tag your foodie friends and follow our page for more **food recommendations, restaurant reviews, and must-try dishes.**

Hashtags:

#FoodieIndia

#FoodRecommendations

#BestFoodInIndia

#FoodBloggersIndia

#FoodLovers

Main Goal:

The caption uses **food-related keywords, a call-to-action, and relevant hashtags** to improve discoverability, encourage sharing, and bring more visitors to the food blog.
